COMPETENCIES

Programming Languages & Technologies

- Python
- CSS
- C++
- JavaScript
- SQL
- HTML

Skills

- Mathematical thinking
- Effective communication
- Agile Methodology

Languages

- Spanish (Native)
- English B1

EDUCATION

2022 - Expected graduation: 2026

Tecnológico de Monterrey

- B.S. in Computer Engineering.
- Practical experience in various programming languages.

2024 - 2025

Member of the Algorithms Group, Tec de Monterrey, Estado de México Campus

- Project Management role within the student group.
- Practiced C++ coding and competitive programming algorithms to participate in the GranPremioMX ICPC competition.

PROJECTS AND EXPERIENCE

Android shop app

September 2024

Frontend development in Kotlin and Jetpack Compose, using Android Studio.

- Implemented a shopping cart allowing users to review their total purchase and make modifications before checkout.
- Designed an interactive FAQ section with a list of frequently asked questions.

Unity web videogame

April 2024

Frontend development in C# using Unity.

- Developed interactive in-game menus.
- Designed user interface and visual resources.

Wearable device

November 2023

Full Stack development using Python and SQL database.

- Developed code for capturing biometric sensor data on Arduino.
- Transmitted data to a server using Python.
- Designed and implemented an SQL database for device, user, and measurements.
- Created a user interface for visualizing the captured data.
